

Audi TT Quattro Roadster, ECU Location on the TT

[Print Page](#)

[Close W](#)

Pull the rubber/vinyl strip off the edge like this.

At the left corner of the windshield, where the plastic pieces is, lift up at that corner. Pull back this piece. It's stuck in a groove below the glass.

Find the cable retaining plug like this.

Reach in a grab it from behind like this.

It pulls out all the way like this.

Do the same on the other side.

The connectors come off the ECU easily then push them out of the way to remove the ECU.,dt> Reve

procedure, making sure the connectors are seated all the way back, and the tab is pushed in all the w:
